PROFESSIONAL SUMMARY

Applied Computer Science graduate with practical experience in software development, web and mobile application development, database management, system administration, and ICT support. Experience with *Java, JavaScript, PHP, C#, Next.js, React.js, C# MAUI, Microsoft SQL Server, PostgreSQL, and Prisma*. Developed, tested, and deployed multiple practical applications, including healthcare management, task management, e-voting, car rental, portfolio, and padtrack for the school going children.

TECHNICAL SKILLS

Programming	Java • JavaScript • PHP • C# • SQL • HTML • CSS
Frameworks	React.js • C# MAUI • Nextjs • React native • Spring boot
Databases	PostgreSQL • Microsoft SQL Server (MSSQL) • Prisma • MySQL
Engineering	REST APIs • ETL • Version Control • Testing • Debugging • Deployment • Technical Documentation
Other	UI/UX Design • ICT Support • System Administration • Digital Literacy Training • Vercel • Postman • Vercel
	Prompt Engineering •Data Analysis •Data Mining and Knowledge Discovery

PROFESSIONAL EXPERIENCE

Systems Administrator & Web Developer | *Bright Promise School — Nairobi, Kenya*

July 2026 – Present

- Develop and maintain the school's website to support online communication and institutional visibility.
- Manage and support digital management systems and information workflows.
- Provide day-to-day ICT support and assist staff with technical issues and digital tools.
- Train staff on ICT tools, digital workflows, and digital literacy.
- Digitize academic records and examination results to reduce reliance on manual processing.
- Maintain website content and support the school's digital communication activities.
- Assist with administration and maintenance of the school's ICT environment.

Full Stack Developer | *Intersoft Technologies Consulting (E.A) Ltd — Kenya*

May – August 2025

- Developed and maintained components of a telemedicine application using C# MAUI and Microsoft SQL Server.
- Implemented application features and addressed identified coding gaps.
- Participated in testing, debugging, and performance improvement activities.
- Worked with SMARTCARE workflows in ETL-related processes.
- Supported customer data migration and onboarding activities.
- Worked with MSSQL data while maintaining integrity and consistency.
- Assisted with deployment, configuration, and maintenance across environments.
- Participated in code reviews and maintained technical documentation.

SOFTWARE PROJECTS

Healthcare Management Information System (HMIS) | *Next.js • React • PostgreSQL • Prisma • Clerk • Tailwind CSS | Vercel*

- Developed a database-driven healthcare management web application with role-based access concepts.
- Built frontend interfaces and integrated application, backend, and database functionality.
- Tested, debugged, and deployed the application on Vercel.

Professional Task Manager | *Next.js • React • PostgreSQL • Prisma | Vercel*

- Developed task creation, organization, updating, and tracking workflows.
- Worked across frontend, backend, and database components.
- Tested and deployed the application on Vercel.

E-Voting System | *Web Application | Vercel*

- Developed an electronic voting application with voting-related workflows and data management.
- Tested system functionality and deployed the application on Vercel.

Car Rental Management Application | *Web Application | Vercel*

- Developed vehicle and rental management workflows with responsive interfaces.
- Tested and deployed the application on Vercel.

PadTrack | *Web Application | Vercel*

- Developed application interfaces, workflows, and data handling for the intended management process.
- Tested and deployed the application on Vercel.

Personal Portfolio Website | *Next.js • React • JavaScript | Vercel*

- Designed and developed a responsive portfolio for professional, academic, and project information.
- Deployed the portfolio as a live application on Vercel.

ACADEMIC

BSc Applied Computer Science — Academic Software Projects | *Chuka University — Kenya*
September 2022 – April 2026

- Developed web and application-based projects as part of the Applied Computer Science program.
- Served as a senior developer within assigned Computer Science project groups.
- Implemented assigned components and contributed to integration with other group-developed components.
- Participated in requirements analysis, development, testing, debugging, and documentation.
- Applied programming, database, user-interface, and software engineering concepts to practical projects.

EDUCATION

Bachelor of Science in Applied Computer Science
Chuka University, Kenya | September 2022 – April 2026 | Second Class Honours

CERTIFICATIONS & TRAINING

- Advanced Prompt Engineering — *Free Academy.al*
- Graphic Design & Canva — *Simplilearn SkillUp*
- Data Analytics Training — *ICT Authority, Kenya*
- SPSS and STATA Statistical Package — *KESAP Research Centre*

RECOMMENDATION

Junior Mobile Developer Recommendation Letter — *Intersoft Technologies Consulting (E.A) Ltd***.**
